

CTS Automation Ltd  
(Formally CTS Engineering Ltd)

**CTS ENGINEERING LIMITED**

**CTS ENGINEERING LTD  
APPLE GARTH HOUSE  
55A ORESTON ROAD  
ORESTON  
PLYMOUTH  
DEVON PL9 7JU**

**TEL: +44 (0) 1752 401081  
FAX: +44 (0) 1752 401128  
E-MAIL: enquiries@ctsautomation.com  
WEB SITE: www.ctsautomation.com**

**YEAR ESTABLISHED – NOVEMBER 1998**  
Employees: 12  
Turnover: £1.5m

**KEY PERSONNEL:**

Trevor Foley: Managing Director  
Dr Peter Harris: Engineering Director

**TRADE ASSOCIATIONS/AFFILIATIONS:**

Mitsubishi Systems Provider  
Matsushita System Integrator  
FSB & Plymouth Chamber of Commerce

**PRODUCT SPECIALITIES:**

Mitsubishi  
Allen Bradley  
G E Fanuc, Siemens  
Scheider Electric  
Omron  
Honeywell  
LTH Conductivity

**INDUSTRY SECTORS:**

Chemical Processing  
Pharmaceutica  
Automotive  
Food and Beverage  
Electronics  
Engineering

**CAPABILITIES:**

Project Management  
Design and Development  
Special Purpose Machine Construction  
PLC Control Systems and support  
Robotic Systems  
SCADA  
Software Support  
Control Panels  
Servo Systems  
CNC Systems  
Vision Recognition Systems  
Automatic Test Equipment  
Engineering and Fabrication  
3D Modelling  
Auto CAD  
Risk Assessment  
Operation & Project Engineering  
Service Engineering & Contractor Support

**W**e have been established in our current form since 1998 as CTS Engineering Ltd and have in that time offered a complete spectra of Electrical, Engineering, design and development as well as site support services to a wide range of customers in the UK and overseas.

We pride ourselves that we can offer our customers complete satisfaction second to none for the following reasons:

**Technical**

The bases of our company are carefully chosen staff that are all fully experienced in all aspects of modern technological engineering systems and control equipment.

Blue chip organizations such as AVX corp., Nortel networks, St Ivel and Heinz demand a high level of skill and expertise, which we address in the following areas,

- Design and Development.
- Special purpose machine Construction.
- PLC control systems and support.
- Production equipment (inc Robotics).
- On going support and maintenance
- Efficient response to breakdown repairs.
- Sound installation skill

**Productivity**

Our commitment to any project is total.

Staff are recruited on a need for work basis. This often means unsociable hours and tight time schedules. The experience and commitment of all our employees ensures maximum productivity and therefore the ultimate cost effective approach to our customers.

**Efficiency**

We operate an open book policy publishing our tariffs, which shows a no nonsense competitive price structure with value for money which we believe you will not find a better service.

**How we can help**

Our flexible approach has meant that our clients typically retain our services as an on-going partnership. We feel we can fulfil any industrial requirement that you may offer to us.

**Special Purpose Machines**

For high quality, cost effective solutions to SPM problems CTS believe it is critical to initially produce the optimum process design. The customers needs and targets are clearly identified by interactive systems Engineering and rapid application development. Using Pro/engineering modelling techniques, the process is then developed by our highly qualified team of mechanical, electrical and software designers to produce cutting edge engineering solutions.
